Lesson 3 APP Custom

1. Project Outcome

Perform the action group file "20" programmed in "Lesson 2 Action Programming" by the custom function of the mobile APP.
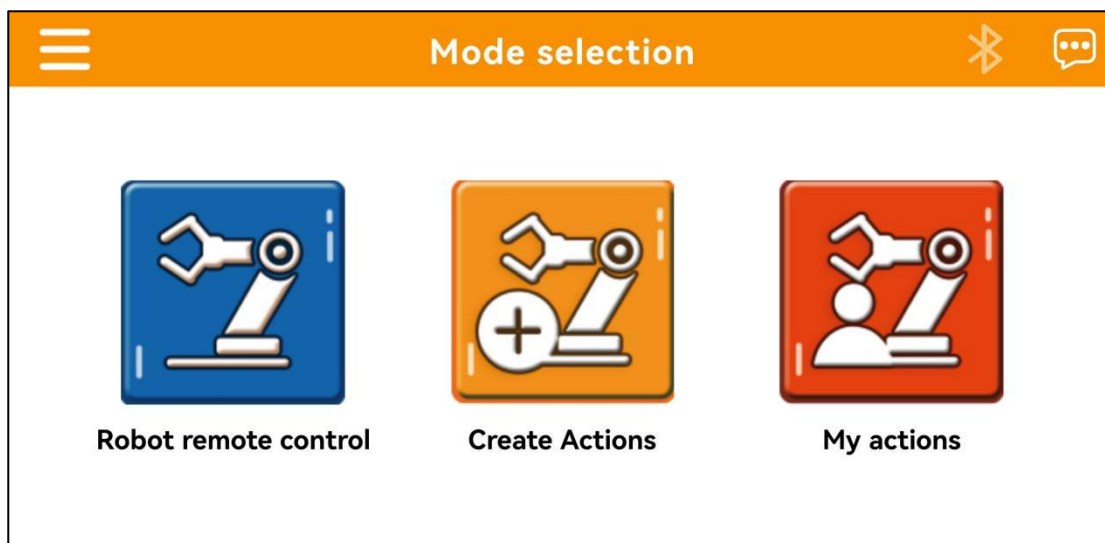

2. Complete Program

2.1 Preparation

1) Confirm that Bluetooth and GPS service have been enabled.

2) Confirm that No.20 action group has been successfully downloaded into the controller (the download is successful, the PC software will prompt).
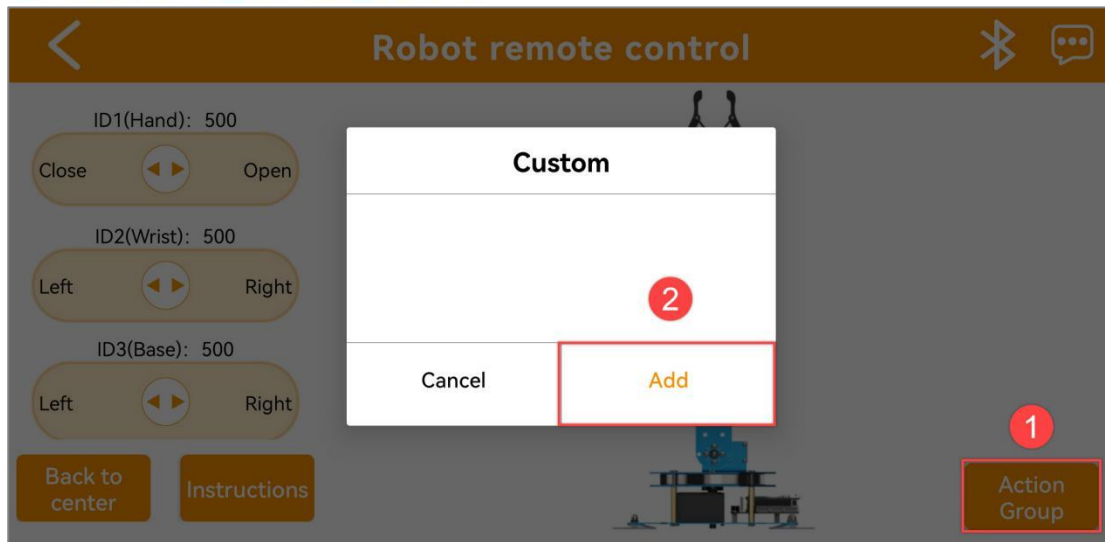

2.2 Operation steps

Step 1: Switch on the robotic arm, and then open "Wonderbot".

Step 2: Refer to the operation steps in "2.Remote Control /Lesson 2 Mobile App Control" to connect the device

Step 3: Enter "Robot remote control" interface.

Step 4: Click "Action Groups " button on the home interface, and click "add" in the pop up interface.
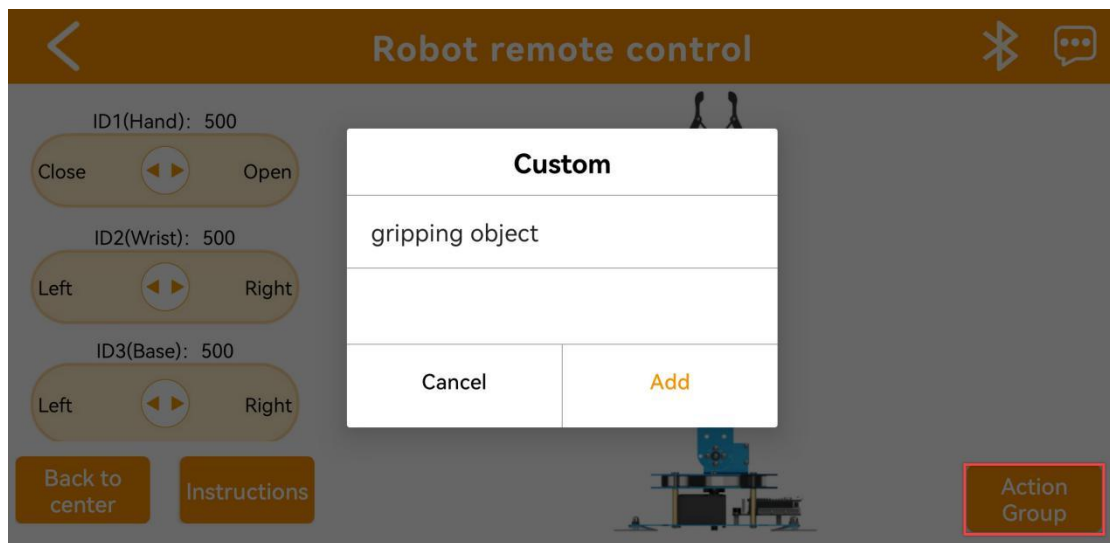

Step 5: Fill in the action group name and action group number in the pop-up interface.

Note: The action group name can be filled in arbitrarily, but the action group number must be filled in correctly, otherwise it cannot be realized.

Step 6: After adding, click the action group name to execute it once.

Step 7: If you need to modify or delete action group, slide or long press the action name button and click "Delete".
